PROFESSIONAL SUMMARY

Full-Stack Software Developer with hands-on experience building and deploying web applications using MongoDB, Express.js, React.js, and Node.js. Experienced in developing RESTful APIs, JWT-based authentication, database-driven applications, and AI-integrated features using Generative AI APIs and structured outputs with Zod. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks. Built and deployed full-stack applications with production-oriented development practices and cloud deployment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python

Frontend: React.js, Redux Toolkit, HTML5, SCSS, Tailwind CSS, Responsive Web Design, Axios

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Cookie-Based Authentication, API Integration, Multer

Databases: MongoDB, MySQL, Mongoose

AI & Generative AI: Google Gemini API, NLP, Zod, Structured AI Outputs

Cloud & Deployment: Vercel, Render, Google Cloud Platform (GCP)

Developer Tools: Git, GitHub, VS Code, Postman, Chrome DevTools

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

RESEARCH & PUBLICATION

Research Author – Cloud Computing | *International Journal of Latest Technology in Engineering, Management & Applied Science (IJLTEMAS)* Sep 2025 – Nov 2025

- Authored and published a peer-reviewed research paper on cloud cost management strategies, analyzing resource optimization approaches across modern cloud environments.
- Conducted a systematic literature review of cloud cost optimization models covering load balancing, auto-scaling, and multi-cloud pricing strategies across AWS, GCP, and Azure.
- Analyzed and synthesized 20+ academic sources to identify practical approaches for improving resource utilization and cost efficiency in enterprise cloud environments.

Publication DOI: doi.org/10.51583/IJLTEMAS.2025.1411000084

PROJECTS

PrepForge AI — AI-Powered Interview Preparation Platform — React.js, Node.js, Express.js, MongoDB, Google Gemini API, Zod, JWT, Puppeteer

[Live Demo](#) | [GitHub](#)

- Built and deployed a full-stack AI-powered interview platform that analyzes resumes, self-descriptions, and job descriptions to generate personalized interview preparation reports.
- Integrated Google Gemini API with Zod structured outputs to generate match scores, technical & behavioral questions, skill-gap analysis, and personalized preparation plans.
- Developed RESTful APIs with Node.js and Express.js, using MongoDB/Mongoose and modular routes, controllers, services, models, and middleware.
- Implemented JWT-based authentication, secure cookie handling, resume uploads, and AI-generated ATS-friendly PDF resumes using Puppeteer; deployed frontend on Vercel and backend on Render.

CodeLens AI — AI-Powered Code Review Platform — React.js, Node.js, Express.js, Google Gemini API, Axios, Prism.js, Markdown

[Live Demo](#) | [GitHub](#)

- Built and deployed a full-stack AI-powered code review platform that analyzes developer code and provides automated feedback on code quality, bugs, security, performance, and best practices.
- Integrated Google Gemini API to generate structured, context-aware code reviews with actionable improvement suggestions and optimized code recommendations.
- Developed RESTful APIs using Node.js and Express.js, implementing a modular backend architecture with separate routes, controllers, and AI service layers.
- Designed a responsive, animated developer-focused interface with React.js, Prism.js syntax highlighting, Markdown rendering, and deployed the frontend on Vercel and backend on Render.

EDUCATION

Bachelor of Technology – Computer Science & Engineering (Data Science)

Kazi Nazrul University, Asansol, West Bengal, India

June 2026

GPA: 8.01 / 10.0

LANGUAGES

English – Professional Working Proficiency **Hindi** – Native Proficiency
